## Retraction Note : Journal of Orthopaedic Surgery and Research (2022) 17:528 https://doi.org/10.1186/s13018-022-03410-z

The Editor-in-Chief has retracted this article. Following publication, concerns were raised that the study reported in this article included data from patients who had undergone tibial transverse transport (TTT) as early as 2015. The authors were asked to provide example scans from 2015 from their dataset. However, the scans provided did not depict the required areas and the procedures discussed in the article. The Editor-in-Chief therefore no longer has confidence in the results and conclusions presented. None of the authors has responded to correspondence from the Publisher about this retraction. Published online: 17 November 2023
